Prices subject to change without notice • \$25.00 Minimum order

Windows software programs (such as the NOAH Real-ear Module and WinCHAP), and audiometric CDs (such as ANL and the Audiometric Test CD) are not returnable.

Warranty is one year parts and labor on new instruments, 6 months on used instruments and repairs.

Computer Programs

All FONIX computer programs require RS232 functionality. This is standard on the 7000/FP35, but is an optional feature that must be purchased on the 6500-CX/FP40 hearing aid analyzers and all FONIX audiometers. The FONIX equipment must also have the following software version:

8000: all versions

7000: 1.20 or higher

6500-CX: 4.60 or higher

FP40: 3.50 or higher

FP35: 2.0 or higher

FA10/FA12: all versions

We recommend the most current software version for best functionality. The computer used for connecting the FONIX equipment must have a free serial port or use a USB to serial adapter. There have been connection issues with computers using Bluetooth technology.

WinCHAP computer hearing aid program

1-2 computers	WINCHAP V3.00	\$600
3-5 computers	WINCHAP SITE	\$900
