## Computer Programs

All FONIX computer programs require RS232 functionality. This is standard on the 7000/FP35, but is an optional feature that must be purchased on the 6500-CX/FP40 hearing aid analyzers and all FONIX audiometers. The FONIX equipment must also have the following software version:

7000: 1.20 or higher

6500-CX: 4.60 or higher

FP40: 3.50 or higher

FP35: 2.0 or higher

FA10/FA12: all versions

We recommend the most current software version for best functionality. The computer used for connecting the FONIX equipment must have a free serial port or use a USB to serial adapter. There have been connection issues with computers using Bluetooth technology.

WinCHAP computer hearing aid program		
1-2 computers	WINCHAP V2.90	\$600
3-5 computers	WINCHAP SITE	\$900
WinCHAP upgrade to the latest major version	WINCHAP V2.90UP	\$100
